Additional Info

Notice of changes in IRREGULARS from our Mills: Due to recent supply chain shortages and demands, mills are no longer differentiating graded vs. non-graded irregulars. As such, you may find some shirts in each dozen may contain visible flaws including, but not limited to, fabric defect, construction imperfections, slight dye lot discrepancies, slight sizing issues, holes, rips, stains, seam puckering, mended tears, mis-stitching, and other flaws. As you know, in past years, these flaws were "graded" for tiers of IRs, 2nds and 3rds. There is no longer a distinction for these tiers.
