PREPASTED THUMBPRINT TOOTHBRUSHES

SKU: CT90011

Great for use in high turnover facilities. This innovative brush was designed (with the dentifrice already on the bristles) for jail or prison intakes and for short term sentences, or pre-trial detainees.

This Flexible Security Toothbrush is designed to bend at 90 degrees and return to its original position. It is a total length of 3" and features 41 tuft soft end rounded nylon bristles. The flexible toothbrush design deters the toothbrush from being sharpened into a point, or shank. The handle has been shortened to inhibit it from being melted down and used as a weapon. An ergonomically designed handle allows for the thumb and index finger to rest comfortably on the handle insuring its functionality.
